

AMENDMENT TO THE ABSTRACT

A washing machine having and using a dynamic absorber ~~is disclosed~~. The washing machine includes a fixing member ~~being~~ provided at a bottom of an outer tub in the washing machine for storing wash water and ~~being~~ an dynamic absorption member ~~being~~ extended from an outer surface of the fixing member, oscillating by vibration transmitted to the outer tub during rotation of an inner tub and having fixed mass and stiffness so as to absorb vibration of the outer tub. And, the dynamic absorption member includes an extension member extended from the outer surface of the fixing member to a radius direction and a mass member provided at an outer end of the extension member.
